

TenderPulse

Daily Tender Intelligence by CPV Code

Find a Tender · Contracts Finder · TED

Web dashboard · email digest · REST API

Livedata Limited — Female-led | UK Public Sector

August 2026

The Problem: Opportunities Slip Away

Manual Searching Is Unsustainable

- Thousands of notices across FTS, Contracts Finder and TED every week
- Relevant opportunities buried among unrelated categories
- CPV codes change; keywords drift; portals differ
- Each missed deadline is a missed pipeline

What this means for you: Your team spends hours scanning portals — and still risks missing the one tender you should have bid.

The Cost of Missing Out

- Public contracts worth thousands to millions are published daily
- Publication-to-deadline windows are often 2–4 weeks
- No single view across UK and EU portals
- Generic alerts fire on volume, not relevance

In practice: Without CPV-matched, daily intelligence, you are relying on luck — not process — to find your next opportunity.

What TenderPulse Does

Scan · Filter · Deliver

- **Scans daily:** FTS, Contracts Finder, TED — one scheduled run at 06:00 UTC
- **Matches your CPV codes:** software, data, services and more
- **Delivers how you want:** web dashboard, email digest, or REST API
- **Scores and prioritises:** risk assessment and AI analysis per notice

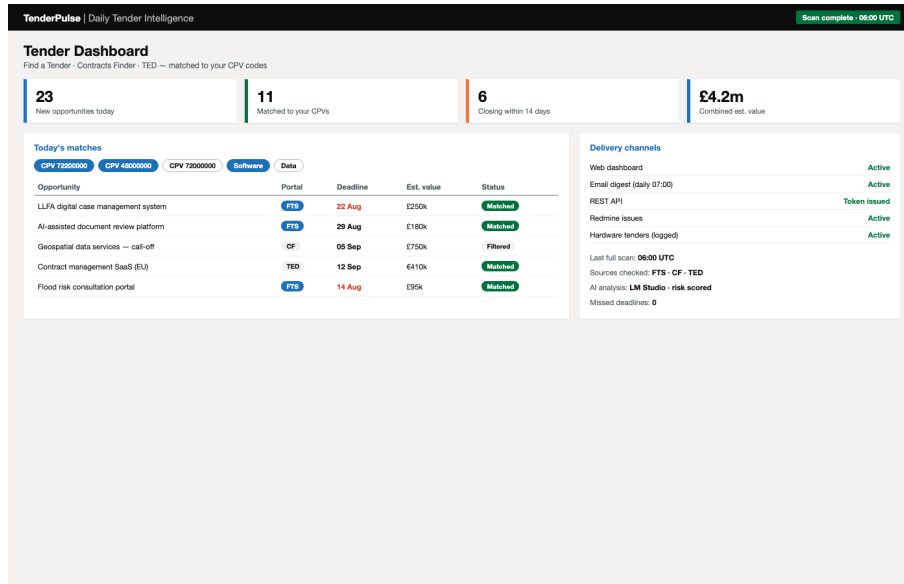

What this means for you: One daily digest replaces hours of manual portal-checking — matched to the codes that matter to your pipeline.

Built for Real Use

- Production scanner in daily use by our own organisation
- Redmine issue creation and SMTP email delivery built in
- Hardware tenders logged separately, software tenders fully analysed
- PDF translation and markdown summaries for TED notices

In practice: This is not a demo — it is the same pipeline we run every morning for our own bid pipeline.

Screen: Tender Dashboard

Daily matched opportunities:

- KPIs: new tenders, CPV matches, closing soon, estimated value
- Filter chips for CPV codes and categories
- Deadline column flags at-risk dates in red
- Portal badges: FTS, Contracts Finder, TED

Delivery channels shown live:

- Web dashboard · email digest · REST API · Redmine issues

What this means for you: A single screen showing everything relevant to your CPVs — updated every day, no portal-hopping.

Screen: REST API & Email Digest

TenderPulse | REST API & Email Digest

14-day free trial · bring your CPVs

Integrate tender intelligence

Web dashboard · email digest · REST API — or white-label for member networks

GET /v1/opportunities?cpv=72200000,48000000

Authorization: Bearer tp_live_*****

```
{
  "date": "2025-08-05",
  "count": 11,
  "matches": [
    {
      "title": "LLFA digital case management system",
      "portal": "FTS",
      "cpv": "72200000",
      "deadline": "2025-08-22",
      "value": 720000,
      "risk_score": 0.84
    }
  ]
}
```

REST · JSON · Webhooks · OpenAPI spec · Rate limits

Daily email digest — 07:00

TenderPulse Daily — 11 matched opportunities for your CPV codes

LLFA digital case management	FTS · due 22 Aug
AI-assisted document review	FTS · due 20 Aug
Contract mgmt SaaS (EU)	TED · due 12 Sep
Flood risk consultation portal	FTS · due 14 Aug
Geospatial data services	CF · due 06 Sep
... 6 more	

Delivered by SMTP with TUI review selector before sending. Scheduled daily at 06:00 UTC scan.

Integrate into your own tools:

- GET /v1/opportunities with CPV and portal filters
- JSON responses with title, portal, CPV, deadline, value, risk score
- Token-based auth · OpenAPI spec · webhooks
- Daily email digest with 07:00 delivery

White-label ready:

- Trade bodies and RDSCs can offer it as a member benefit
- One integration serves every client or member

What this means for you: Tender intelligence becomes a plug-in — not another portal to log into.

Who TenderPulse Is For

Priority	Segment	What they use it for
1	Bid consultancies & tender writers	One API serving many clients – highest value per deal
2	UK SMEs bidding on public tenders	Bid managers tracking opportunities without manual searching
3	Trade bodies & membership orgs	White-label member benefit (ADS, TechUK, Make UK, FSB)
4	Regional growth hubs / LEPs	Business support and pipeline intelligence for local firms
5	International vendors	UN vendors, EU SMEs, export-oriented firms via TED

Why It Works — Proof Points

Claim	Evidence
Production scanner, not a mock-up	In daily scheduled use by Livedata’s own bid team
Multi-platform coverage	FTS + Contracts Finder + TED in one pipeline
Intelligent filtering	CPV classification, hardware/software split, AI risk scores
Integrated delivery	Redmine issues, SMTP alerts, TUI email selector
Compliance-ready	JOSCAR-accredited, NHS DSPT (Standards Met), ICO-registered

Same codebase, same schedule, same results — the product is the tool we already depend on.

Commercial Model

Tier	What's included	Indicative
Free	14-day API trial / sample digest	£0
Pro	Web dashboard + email alerts	£49–£99/mo
API	Token-based access, volume pricing	£199–£499/mo
White-label	Member network licence for trade bodies	Annual licence

All pricing in GBP. Pilot discount for first 10 customers. Pricing quoted only when asked in formal engagement.

How We Deliver

Try It First

- 14-day free API trial with your CPV codes
- Trial digest email set up within 24 hours
- Live demo of scheduled scans and delivery channels
- Awarded-contract intelligence on request

What this means for you: You see real matches for your codes before committing — zero risk trial.

Then Scale

- Pick Pro, API, or white-label once the trial proves value
- Your CPVs, your cadence, your delivery channel
- Same infrastructure Livedata runs daily
- Fixed monthly pricing in GBP

In practice: Within a week you have a daily digest of relevant opportunities — and the dead time spent searching is gone.

Next Steps

1. **15-minute call** — show the scanner live on your CPV codes
2. **Trial setup** — 14-day free API trial / digest within 24 hours
3. **Review** — see matched opportunities for your pipeline
4. **Choose a tier** — Pro, API, or white-label licence

Thank You
